## I. Purpose of Report & Study Objectives

The purpose of this traffic analysis and report is to document the potential traffic impacts of the proposed expansion and redevelopment of the Kingsdale Shopping Center located in Upper Arlington, Ohio. This traffic impact study (TIS) is being required by City of Upper Arlington as part of the development approval process. A Memorandum of Understanding (MOU) was submitted and approved by the City of Upper Arlington. Said MOU can be found in **Appendix A**.

## II. Proposed Development

### A. Off-Site Developments

The study area is bounded by Tremont Road to the west, Zollinger Road to the south, Northwest Boulevard to the east, and Fishinger Road to the north. The surrounding area consists of residential developments in all directions, restaurants and banks to the north, and the existing Kingsdale Shopping Center development to the south.

### B. On-Site Development

#### Location

The site is located within the existing Kingsdale Shopping Center, on the north end of the development. **Figure 1** shows the location of the proposed site in central Ohio and **Figure 2** shows the study area.

*Figure 1 – Location in Central Ohio*

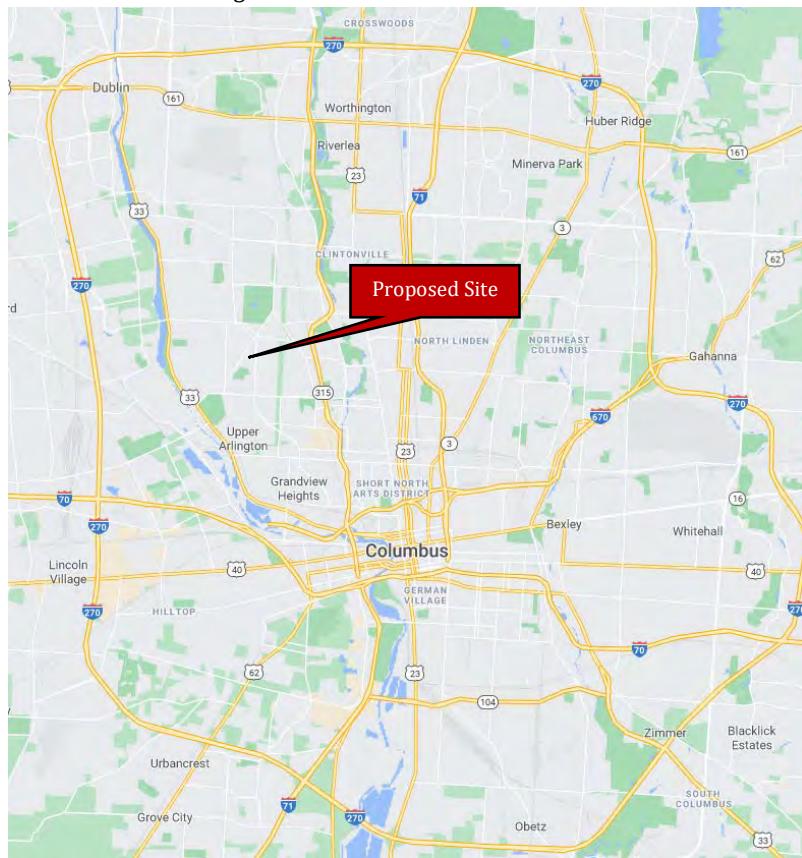

Figure 2 – Location of the Proposed Development (Yellow), Site Drive, and Study Intersections

### Land Use & Intensity

The site is currently an unused section of the existing Kingsdale Shopping Center. It is proposed to be redeveloped as a mixed-use residential and retail development with the following approximation of uses and sizes: 363 apartment units located in a mid-rise building, assisted living facility with 52 beds, 52 units of attached senior housing, 30,000 SF of office space, 6,000 SF restaurant, and 100,000 SF community center.

The site plan is provided in **Appendix A**.

## III. Area Conditions

### A. Area of Influence

The study intersections for the proposed development are listed below. Numbers correspond to **Figure 2**.

1. Fishinger Road & Tremont Road & Northwest Boulevard
2. Tremont Road & Ridgecliff Road
3. Tremont Road & Milden Road
4. Tremont Road & Zollinger Road
5. Northwest Boulevard & Zollinger Road
6. Northwest Boulevard & Kingsdale Shopping Center Signal
7. Northwest Boulevard & Trentwood Road

#### **B. Jurisdictions**

The proposed site and all study intersections fall within City of Upper Arlington jurisdiction.

#### **C. Traffic Volumes**

Peak hour turning movement count data was collected at all study intersections in August 2020, with the exception of the 5-point intersection of Fishinger Road & Tremont Road & Northwest Boulevard. An existing count collected at this intersection in January 2020 was found on the Mid-Ohio Regional Planning Commission (MORPC) Transportation Data Management System (TDMS).

Traffic patterns were still impacted by the COVID-19 pandemic at the time of the August 2020 data collection. The count from the Fishinger Road & Tremont Road & Northwest Boulevard intersection, which was collected in January 2020 prior to any closures caused by the pandemic, was used as a baseline to adjust the other counts to 'pre-pandemic' volumes. An adjustment factor of 1.4 for the AM Peak hour and 1.15 for the PM Peak hour was utilized. All count data can be found in **Appendix B**.

## **IV. Projected Traffic**

#### **A. Background Traffic**

For analysis, the Opening Year of the development is 2022 and the Design, or Horizon Year, is 2032. In order to project the count data to the Opening and Horizon Years, growth rates were calculated using historic counts from the intersections of Tremont Road & Milden Road, Tremont Road & Zollinger Road, and Northwest Boulevard & Zollinger Road and the adjusted 2020 counts. As the calculated growth rates were all negative, a blanket growth rate of 0.5% was used in order to be conservative. This growth rate was applied to the adjusted count data to develop Background, or No Build, traffic for the Opening and Horizon Years. Historic count data and growth rate calculations can be found in **Appendix B**.

#### **B. Site Traffic**

##### **Trip Generation**

Trips for the proposed site were generated using standard Institute of Transportation Engineers (ITE) practices and the *Trip Generation Manual*, 10<sup>th</sup> edition, data via the OTISS program<sup>1</sup>. Land Use Codes (*LUC*) 221 – *Multifamily Housing (Mid-Rise)*, 252 – *Senior Adult Housing – Attached*, 254 – *Assisted Living*, 495 – *Recreational Community Center*, 710 – *General Office Building*, and 932 – *High-Turnover (Sit-Down) Restaurant* were used to generate trips

<sup>1</sup> Online Traffic Impact Study Software developed by ITE and Transoft Solutions.

for the proposed development. **Table 1** shows the trip generation. The full trip generation details can be found in **Appendix C**. Trip generation for the proposed site was preapproved by the City of Upper Arlington prior to any analysis being completed.

*Table 1 – Proposed Site Trip Generation Summary*

Land Use	Size	AM Peak		PM Peak		
		Entry	Exit	Entry	Exit	
<b>221 – Mid-Rise Residential with 1<sup>st</sup>-Floor Commercial</b>	363 Dwelling Units	31	90	93	60	
		0	2	2	3	
		0	0	0	0	
		31	88	91	57	
<b>254 – Assisted Living</b>	52 Beds	6	4	5	8	
		0	0	0	1	
		0	0	0	0	
		6	4	5	7	
<b>252 – Senior Adult Housing - Attached</b>	52 Dwelling Units	4	7	8	7	
		0	0	0	0	
		0	0	0	0	
		4	7	8	7	
<b>932 – High-Turnover (Sit-Down) Restaurant</b>	6,000 SF Gross Floor Area	33	2	36	22	
		7	7	5	4	
		0	0	13	8	
		26	20	18	10	
<b>495 – Recreational Community Center</b>	100,000 SF Gross Floor Area	122	63	115	130	
		0	0	2	2	
		0	0	0	0	
		122	63	113	128	
<b>710 – General Office Building</b>	30,000 SF Gross Floor Area	47	8	6	30	
		7	5	2	1	
		0	0	0	0	
		40	3	4	29	
<b>Total</b>		243	199	263	257	
<b>Internal Capture</b>		14	14	11	11	
<b>Pass-By</b>		0	0	13	8	
<b>Non-Pass-By</b>		229	185	239	238	

Site traffic was distributed to/from the site based on count data, knowledge of the surrounding area, and engineering judgement. Site traffic was added to No Build traffic to produce Build traffic volumes for the Opening and Horizon Years. The full volume calculations can be found in **Appendix D**.

## V. Traffic Analysis

### A. Turn Lane Warrant Analysis

Turn lane warrant analyses were conducted at unsignalized study intersections using standard ODOT turn lane warrant graphs. If a turn lane was warranted in any particular scenario, the length was calculated using methodologies in the ODOT Location and Design (L&D) Manual and it was represented as such in the capacity analysis.

## B. Capacity Analysis

The HCM 6<sup>th</sup> Edition module of Synchro Version 10 software was used to analyze capacity at the intersections of Tremont Road with Ridgecliff Road, Milden Road, and Zollinger Road, and Northwest Boulevard with Zollinger Road and Trentwood Road. The intersections of Fishinger Road & Tremont Road & Northwest Boulevard and Northwest Boulevard & Kingsdale Shopping Center Signal were analyzed using the Synchro output due to the intersection configurations and phasing not being supported by HCM methodologies.

A minimum LOS of D for the overall intersection/approaches and LOS E for each individual movement during peak traffic hours was considered acceptable. If an intersection fell below these criteria, mitigation strategies were developed to bring each movement or intersection back to an acceptable LOS.

## C. Queuing Analysis

The SimTraffic module of Synchro 10 was used to perform queuing analysis at the study intersections. Results were generated based on the average of five runs. If queuing issues were present, mitigation strategies were developed to reduce queuing.

# VI. Results

## A. Turn Lane Warrant Analysis

Results of the turn lane warrant analysis show that a 100' southbound left turn lane is warranted at the intersection of Tremont Road & Ridgecliff Road in both the Opening and Horizon Year Build scenarios. A 125' southbound left turn lane is also warranted at the intersection of Northwest Boulevard & Trentwood Road in all Build and No Build scenarios. All turn lane lengths are inclusive of a 50' diverging taper. The full turn lane warrant analysis and length calculations can be found in **Appendix E**.

## B. Capacity Analysis

Results of the capacity analysis can be seen in **Table 2**. Baseline analysis assumes existing signal clearance intervals and lane configurations/stop-control. An AM peak cycle length of 100 seconds and PM peak cycle length of 120 seconds was assumed at all intersections except for the intersection of Fishinger Road & Tremont Road & Northwest Boulevard, which was assumed to have a cycle length of 140 seconds during both peaks. The warranted southbound left turn lane at the intersection of Tremont Road & Ridgecliff Road was assumed to be installed in the Build scenarios.

The total delay for stop-controlled intersections is represented by the worst approach LOS. Red text signifies an approach and/or movement delay that exceeds acceptable LOS standards. The full capacity analysis can be found in **Appendix F**.

Table 2 – Baseline Capacity Analysis Summary

As seen above in **Table 2**, the intersection of Fishinger Road & Tremont Road & Northwest Boulevard has failing LOS in all scenarios except for the Opening Year PM No Build scenario. The intersection of Northwest Boulevard & Zollinger Road has failing LOS in all PM scenarios. Thus, intersection improvements are required for both intersections.

The intersection of Tremont Road & Milden Road experienced failing LOS in both PM No Build scenarios. However, the delay is only 0.3 seconds outside of acceptable and the addition of Build traffic allows the intersection to achieve acceptable standards. No mitigation was attempted for this intersection.

All other intersections maintained acceptable LOS in all scenarios. Improvements needed at each intersection to meet LOS requirements in each scenario are summarized in **Table 3**.

*Table 3 – Improvements Summary*

Intersection	Opening Year		Horizon Year	
	No Build	Build	No Build	Build
Fishinger Rd & Tremont Rd & Northwest Blvd	Add 465' EBR turn lane	Add 390' EBR turn lane Add slip EBR turn lane	Add 365' EBR turn lane Add slip EBR turn lane	Add third EBT Add 490' EBR turn lane
Northwest Blvd & Zollinger Rd	Remove split phasing for EB/WB approaches	Remove split phasing for EB/WB approaches	Remove split phasing for EB/WB approaches	Remove split phasing for EB/WB approaches

Capacity analysis was conducted assuming the improvements listed in **Table 3** are implemented. Results of the capacity analysis with improvements can be seen in **Table 4**. The full capacity analysis with improvements can be found in **Appendix F**.

*Table 4 – Capacity Analysis with Improvements Summary*

Intersection	Approach	Opening Year				Horizon Year			
		AM No Build	AM Build	PM No Build	PM Build	AM No Build	AM Build	PM No Build	PM Build
Fishinger Rd & Tremont Rd & Northwest Blvd	Eastbound	D/53.8	D/52.8	D/52.8	D/42.8	D/54.8	D/54.6	D/45.1	D/53.6

	<b>Total</b>	<b>D/49.1</b>	<b>D/49.0</b>	<b>D/46.7</b>	<b>D/45.5</b>	<b>D/50.2</b>	<b>D/50.0</b>	<b>D/45.7</b>	<b>D/49.1</b>
Northwest Blvd & Zollinger Rd	Eastbound	D/43.1	D/43.1	D/51.2	D/37.5	D/47.0	D/47.1	D/47.1	D/37.0
	Westbound	D/40.9	D/40.7	D/41.3	D/43.1	D/40.1	D/40.0	D/41.1	D/42.6
	Northbound	B/16.2	B/17.2	C/26.1	C/26.1	B/16.9	B/17.9	C/26.0	C/27.7
	Southbound	D/38.4	D/38.7	D/47.6	D/48.4	D/38.6	D/38.9	D/49.0	D/48.1
	<b>Total</b>	<b>C/32.1</b>	<b>C/32.3</b>	<b>D/40.8</b>	<b>D/38.2</b>	<b>C/33.3</b>	<b>C/33.4</b>	<b>D/40.1</b>	<b>D/38.4</b>

As can be seen in **Table 4**, the improvements outlined in **Table 3** result in acceptable LOS for all scenarios.

### C. Queuing Analysis

Baseline queuing analysis can be seen in **Tables 5 and 6**. Average and 95<sup>th</sup> percentile queues are shown for each lane of each study intersection along with the approximate available storage space. Queues that exceed available storage space are shown in red. The full queuing analysis can be found in **Appendix G**.

Table 5 – Opening Year Baseline Queueing Analysis Summary (Average/95<sup>th</sup> Percentile)

## VII. Recommendations and Conclusions

Based on the results of the turn lane warrant analysis, it is recommended that a 100' southbound left turn lane be installed at Tremont Road & Ridgecliff Road as a Build improvement. Additionally, it is recommended that a 125' southbound left turn lane be installed at the Trentwood Road & Northwest Boulevard as a No Build improvement.

Based on the results of the capacity and queuing analysis, it is recommended that an eastbound right turn lane be installed at the Fishinger Road & Tremont Road & Northwest Boulevard intersection as a No Build improvement. The analysis shows that a second right turn lane is required on this approach to achieve acceptable LOS. However, this is not recommended due to right-of-way constraints and the close proximity of the existing Fifth Third Bank. It is recommended that the existing split-phasing at the Northwest Boulevard & Zollinger Road intersection be changed to traditional NEMA phasing in order to achieve acceptable LOS in No Build and Build conditions. This is a No Build improvement.

No additional improvements are required and thus, none are recommended.

## Traffic Impact Study Memorandum of Understanding

Re: Proposed Kingsdale Shopping Center Expansion TIS  
Between: The City of Upper Arlington and Carpenter Marty Transportation

---

Carpenter Marty Transportation (CM) has been retained to complete a traffic impact study (TIS) for a proposed expansion of the Kingsdale Shopping Center in Upper Arlington, OH. The development is proposed to be mixed-use and include senior housing, multifamily housing, ground floor commercial, a community center and/or office, and a parking garage. The purpose of this Memorandum of Understanding (MOU) is to establish a mutually agreeable scope for a TIS of the proposed development. The proposed study scope, based on a conference call with the City of Upper Arlington, is below.

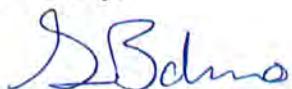

### Proposed TIS Scope

- There are currently significant traffic volume changes caused by the COVID-19 pandemic. Therefore, traffic counts may need adjusted and/or alternative methods must be utilized to develop traffic volumes. CM is proposing to obtain AM Peak and PM Peak traffic volumes and perform analysis at the below listed intersections. Some counts are available via online resources. Others will be collected by CM and adjusted based on pre-COVID-19 count data obtained at the Fishinger Road/Tremont Road/Northwest Boulevard intersection.
  - Fishinger Road/Tremont Road/Northwest Boulevard (January 2020 data available via online resources)
  - Trentwood Road & Northwest Boulevard (to be collected by CM)
  - Tremont Road & Ridgecliff Road/Proposed Site Access (to be collected by CM)
  - Northwest Boulevard & Existing, Signalized Full Access to Kingsdale Shopping Center (to be collected by CM)
  - Tremont Road & Mildon Road (to be collected by CM)
  - Tremont Road & Zollinger Road (to be collected by CM)
  - Northwest Boulevard & Zollinger Road (to be collected by CM)
- Trip Generation – Generate trips for the proposed development using ITE Trip Generation standards and the OTISS program. Trips will be assigned to the proposed site access points according to a distribution determined from counts, area knowledge/travel patterns, and engineering judgment. ITE recommended pass-by and internal capture trip reductions will be applied. Trip generation is not being provided at this time as the site plan and specific uses are still developing. However, trip generation will be provided for preapproval prior to analysis being completed.
- Volume Development - Develop Opening Year (2022) and Horizon Year (2032) traffic plates for Build and No Build, AM and PM Peaks based on the traffic distribution developed above and growth rates. Growth rates will be obtained from MORPC or calculated using historic data to develop Background (No Build) traffic for the Opening and Horizon Years. Site traffic will be added to the Background traffic to develop Build traffic.

- Capacity Analysis - Perform capacity analysis using the HCM 6<sup>th</sup> Edition module of Synchro 10 software at the below intersections for Build and No Build, AM and PM Peaks.
  - Fishinger Road/Tremont Road/Northwest Boulevard
  - Trentwood Road & Northwest Boulevard
  - Tremont Road & Ridgecliff Road/Proposed Site Access
  - Northwest Boulevard & Existing, Signalized Full Access to Kingsdale Shopping Center
  - Tremont Road & Milden Road
  - Tremont Road & Zollinger Road
  - Northwest Boulevard & Zollinger Road
- If acceptable Level-of-Service (LOS) is not obtained, determine what mitigation is necessary to obtain acceptable LOS. A minimum LOS of D for the overall intersection/approaches, and LOS E for individual movements will be considered acceptable for all intersections.
- Queuing Analysis - Perform queuing analysis using the SimTraffic module of Synchro 10 software at the above listed intersections for Build and No Build, AM and PM Peaks. Mitigate queues that exceed available storage space.
- Turn Lane Warrant Analysis - Perform turn lane warrant analyses at all unsignalized intersections using standard ODOT turn lane warrant graphs. Calculate lengths for any turn lanes that are warranted.
- Report - Develop a report that documents what is necessary to satisfy Upper Arlington which typically includes analysis, results, conclusions, and recommendations.

Please signify your concurrence with this MOU by signing below. If you have any questions or comments, please contact Drew Laurent at 614-656-2421 or [dlaurent@cmtran.com](mailto:dlaurent@cmtran.com).

Sincerely,

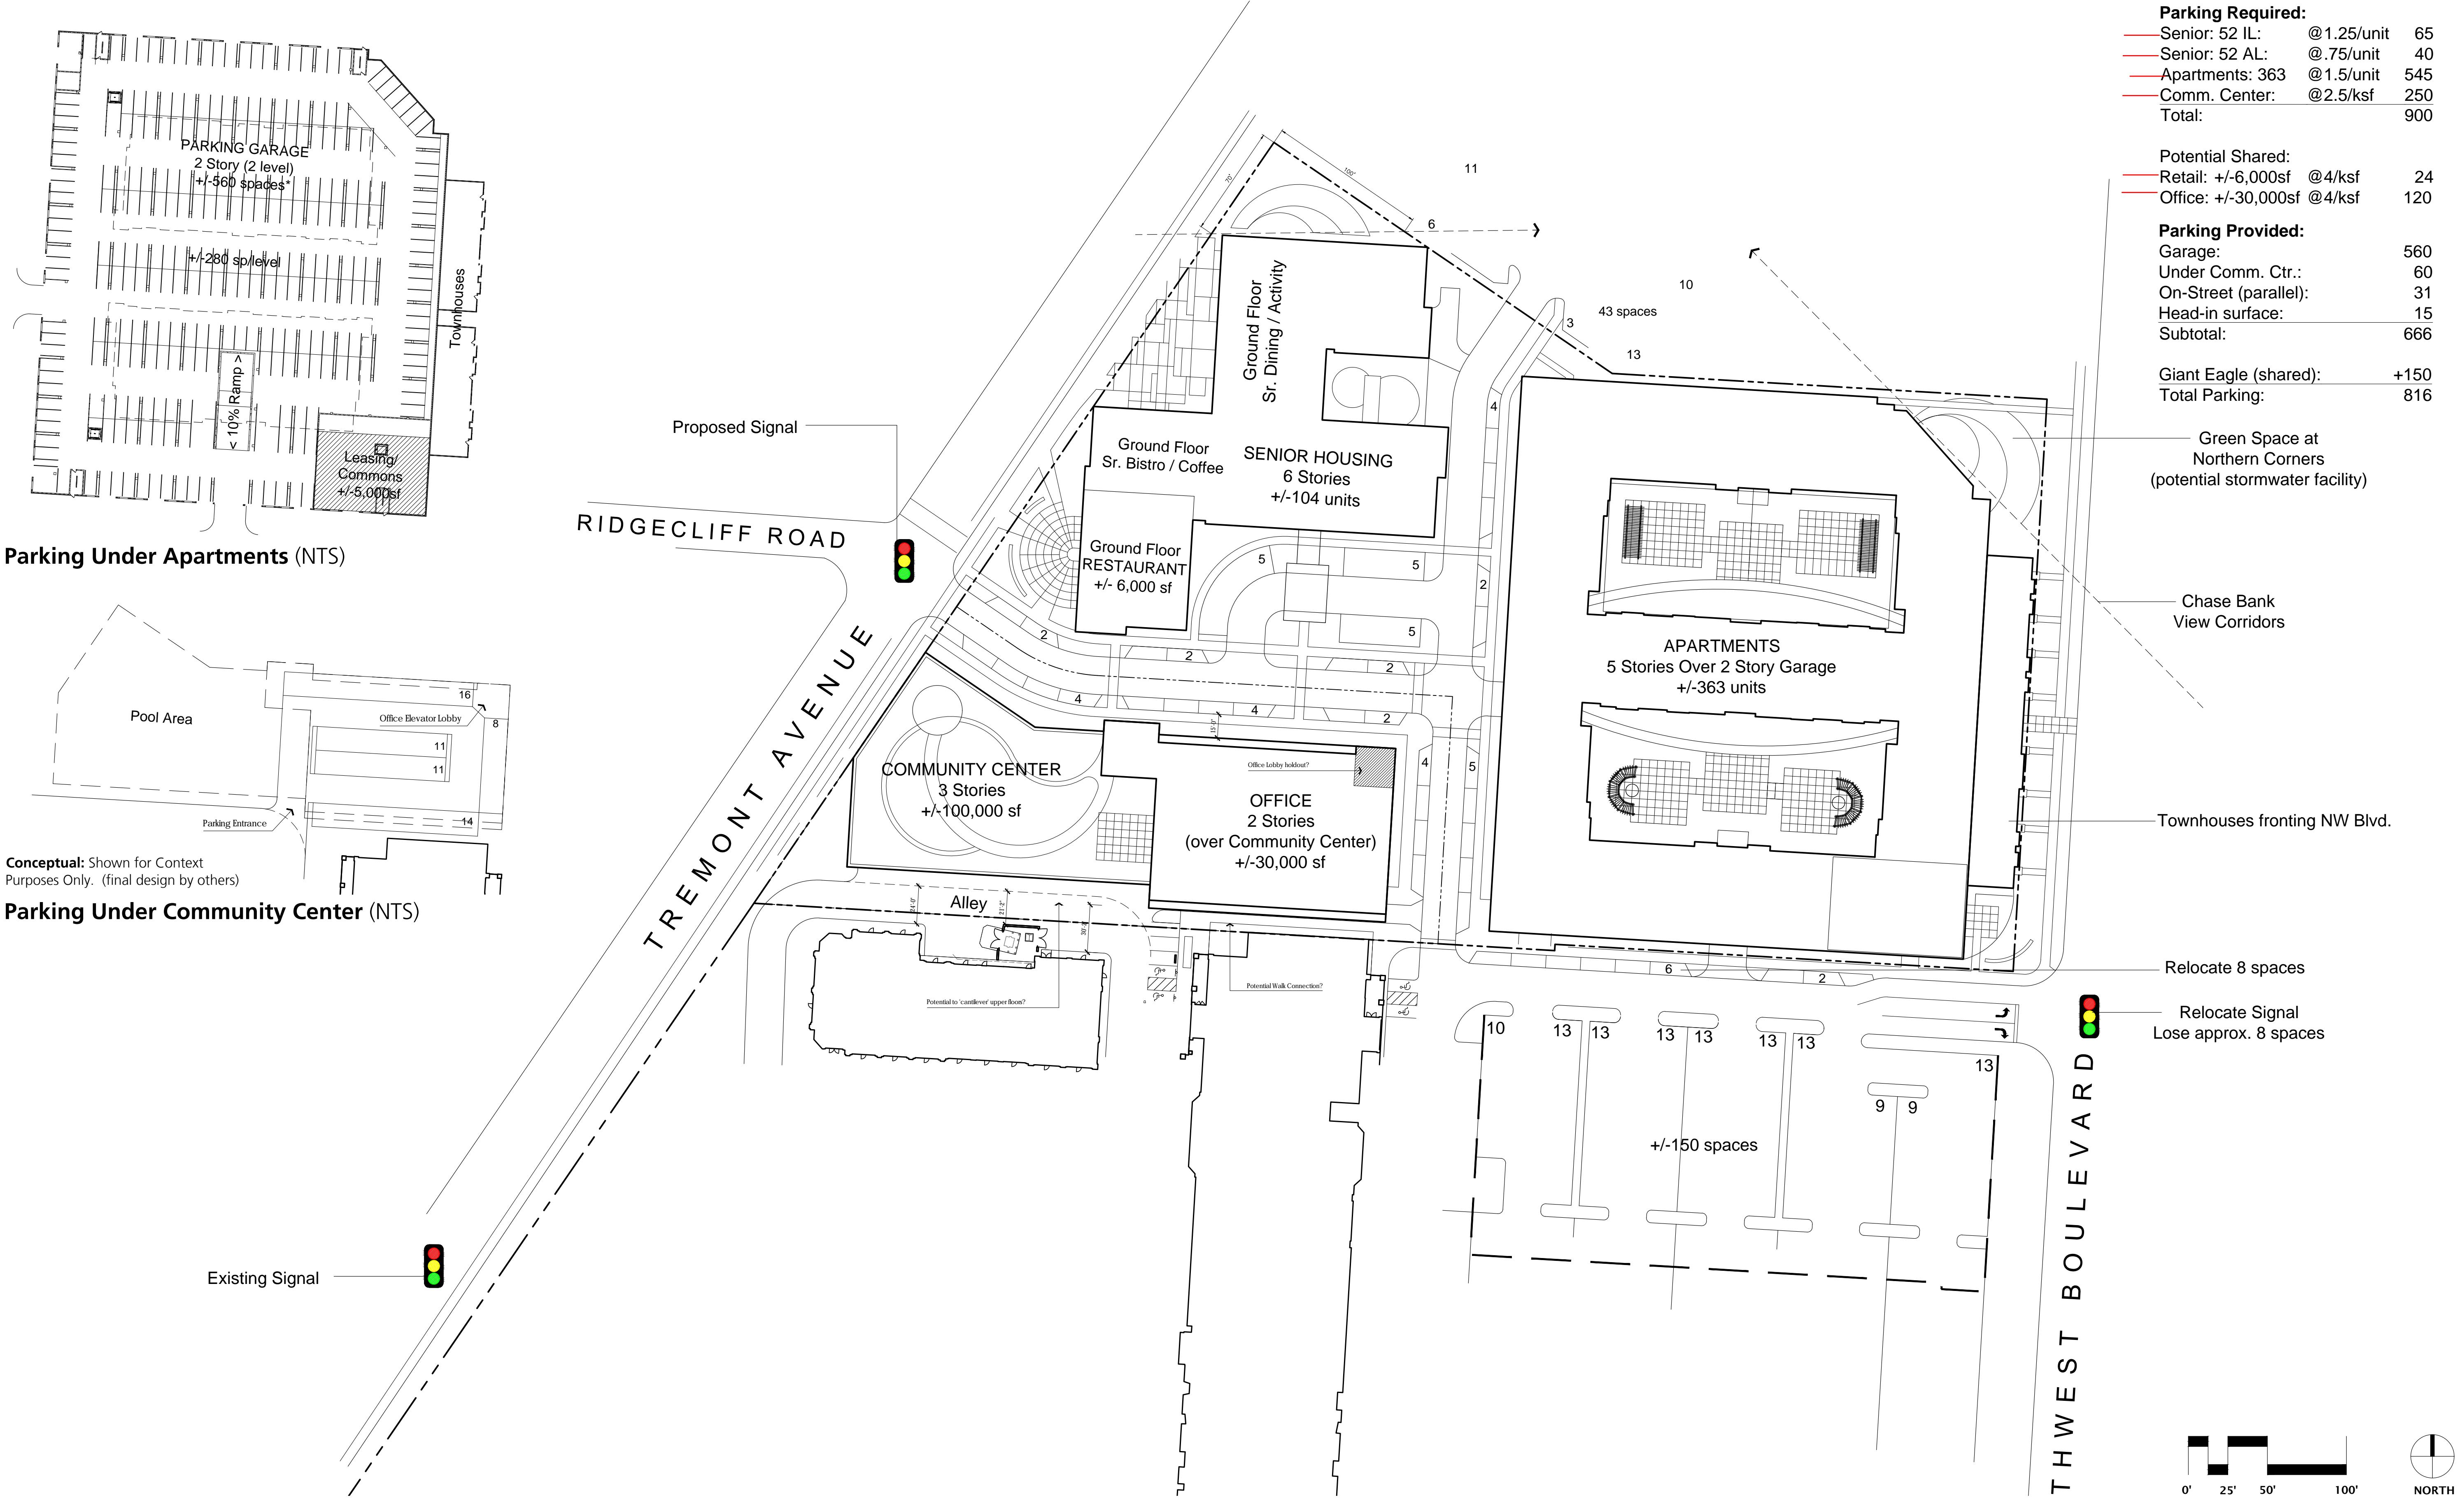

Gina Balsamo, PE  
Project Manager  
Carpenter Marty Transportation

### Growth Rate Calculations from Historic Count Data

Growth Rate = [(2020 Volume / Historic Volume) - 1] / (2020 - Historic Year)

Tremont Road & Milden Road (7-9 & 4-6 Combined)	Tremont Road & Zollinger Road (7-9 & 4-6 Combined)
2014 Count Data	3278
2020 Count Data	1833
Growth Rate	-7.35%
	2014 Count Data
	4566
	2020 Count Data
	2302
	Growth Rate
	-8.26%

### Northwest Boulevard & Zollinger Road (4-6)

2017 Count Data	2982
2020 Count Data	2097
Growth Rate	-9.89%

\* In order to be conservative, a blanket growth rate of 0.50% was used.
